MILITARY APPLICATIONS

Wire Rope Industries is one of the largest suppliers of military-grade wire ropes in the world. Our products are custom designed and manufactured to meet the extremely rigid specifications and testing requirements of the United States Department of Defense.

WIRE ROPE
INDUSTRIES

PRODUCT & SERVICES

ARRESTOR, LAUNCH & ELEVATOR SYSTEMS FOR AIRCRAFT CARRIERS

WRI is the largest manufacturer in the world for specialized aircraft arresting systems. We are also the only approved supplier for the manufacture of aircraft launching bridles and pendant assemblies made to MIL-322036 standard. These strict approval processes, utilized by the U.S. Forces, ensure that maximum product quality and consistency are maintained and verified.

Rope constructions and designs vary depending on the specifications. Please contact us for more information.
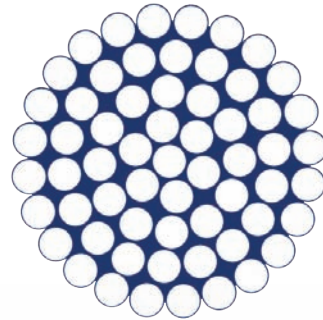

ASSEMBLY & TECHNICAL SERVICES

» Proofloading and certification

» Certified socketing & attachments

» Seaworthy packaging

» Custom design and engineering assistance

» In-house quality control

SPECIALIZED STRUCTURAL STRAND

We offer custom structural strands for installations like tall communication towers and suspended structures. Our machinery is capable of producing high quality strands up to 6" (150+mm) which, combined with the cutting egde expertise in wire coating technology, allows us to design and manufacture strands to almost any specification. WRI is currently supplying highly corrosion-resistant tower strands to one of the largest communication bases in the world.

Contact us to discuss your requirements and receive more information on how we can tailor a custom strand product for you
